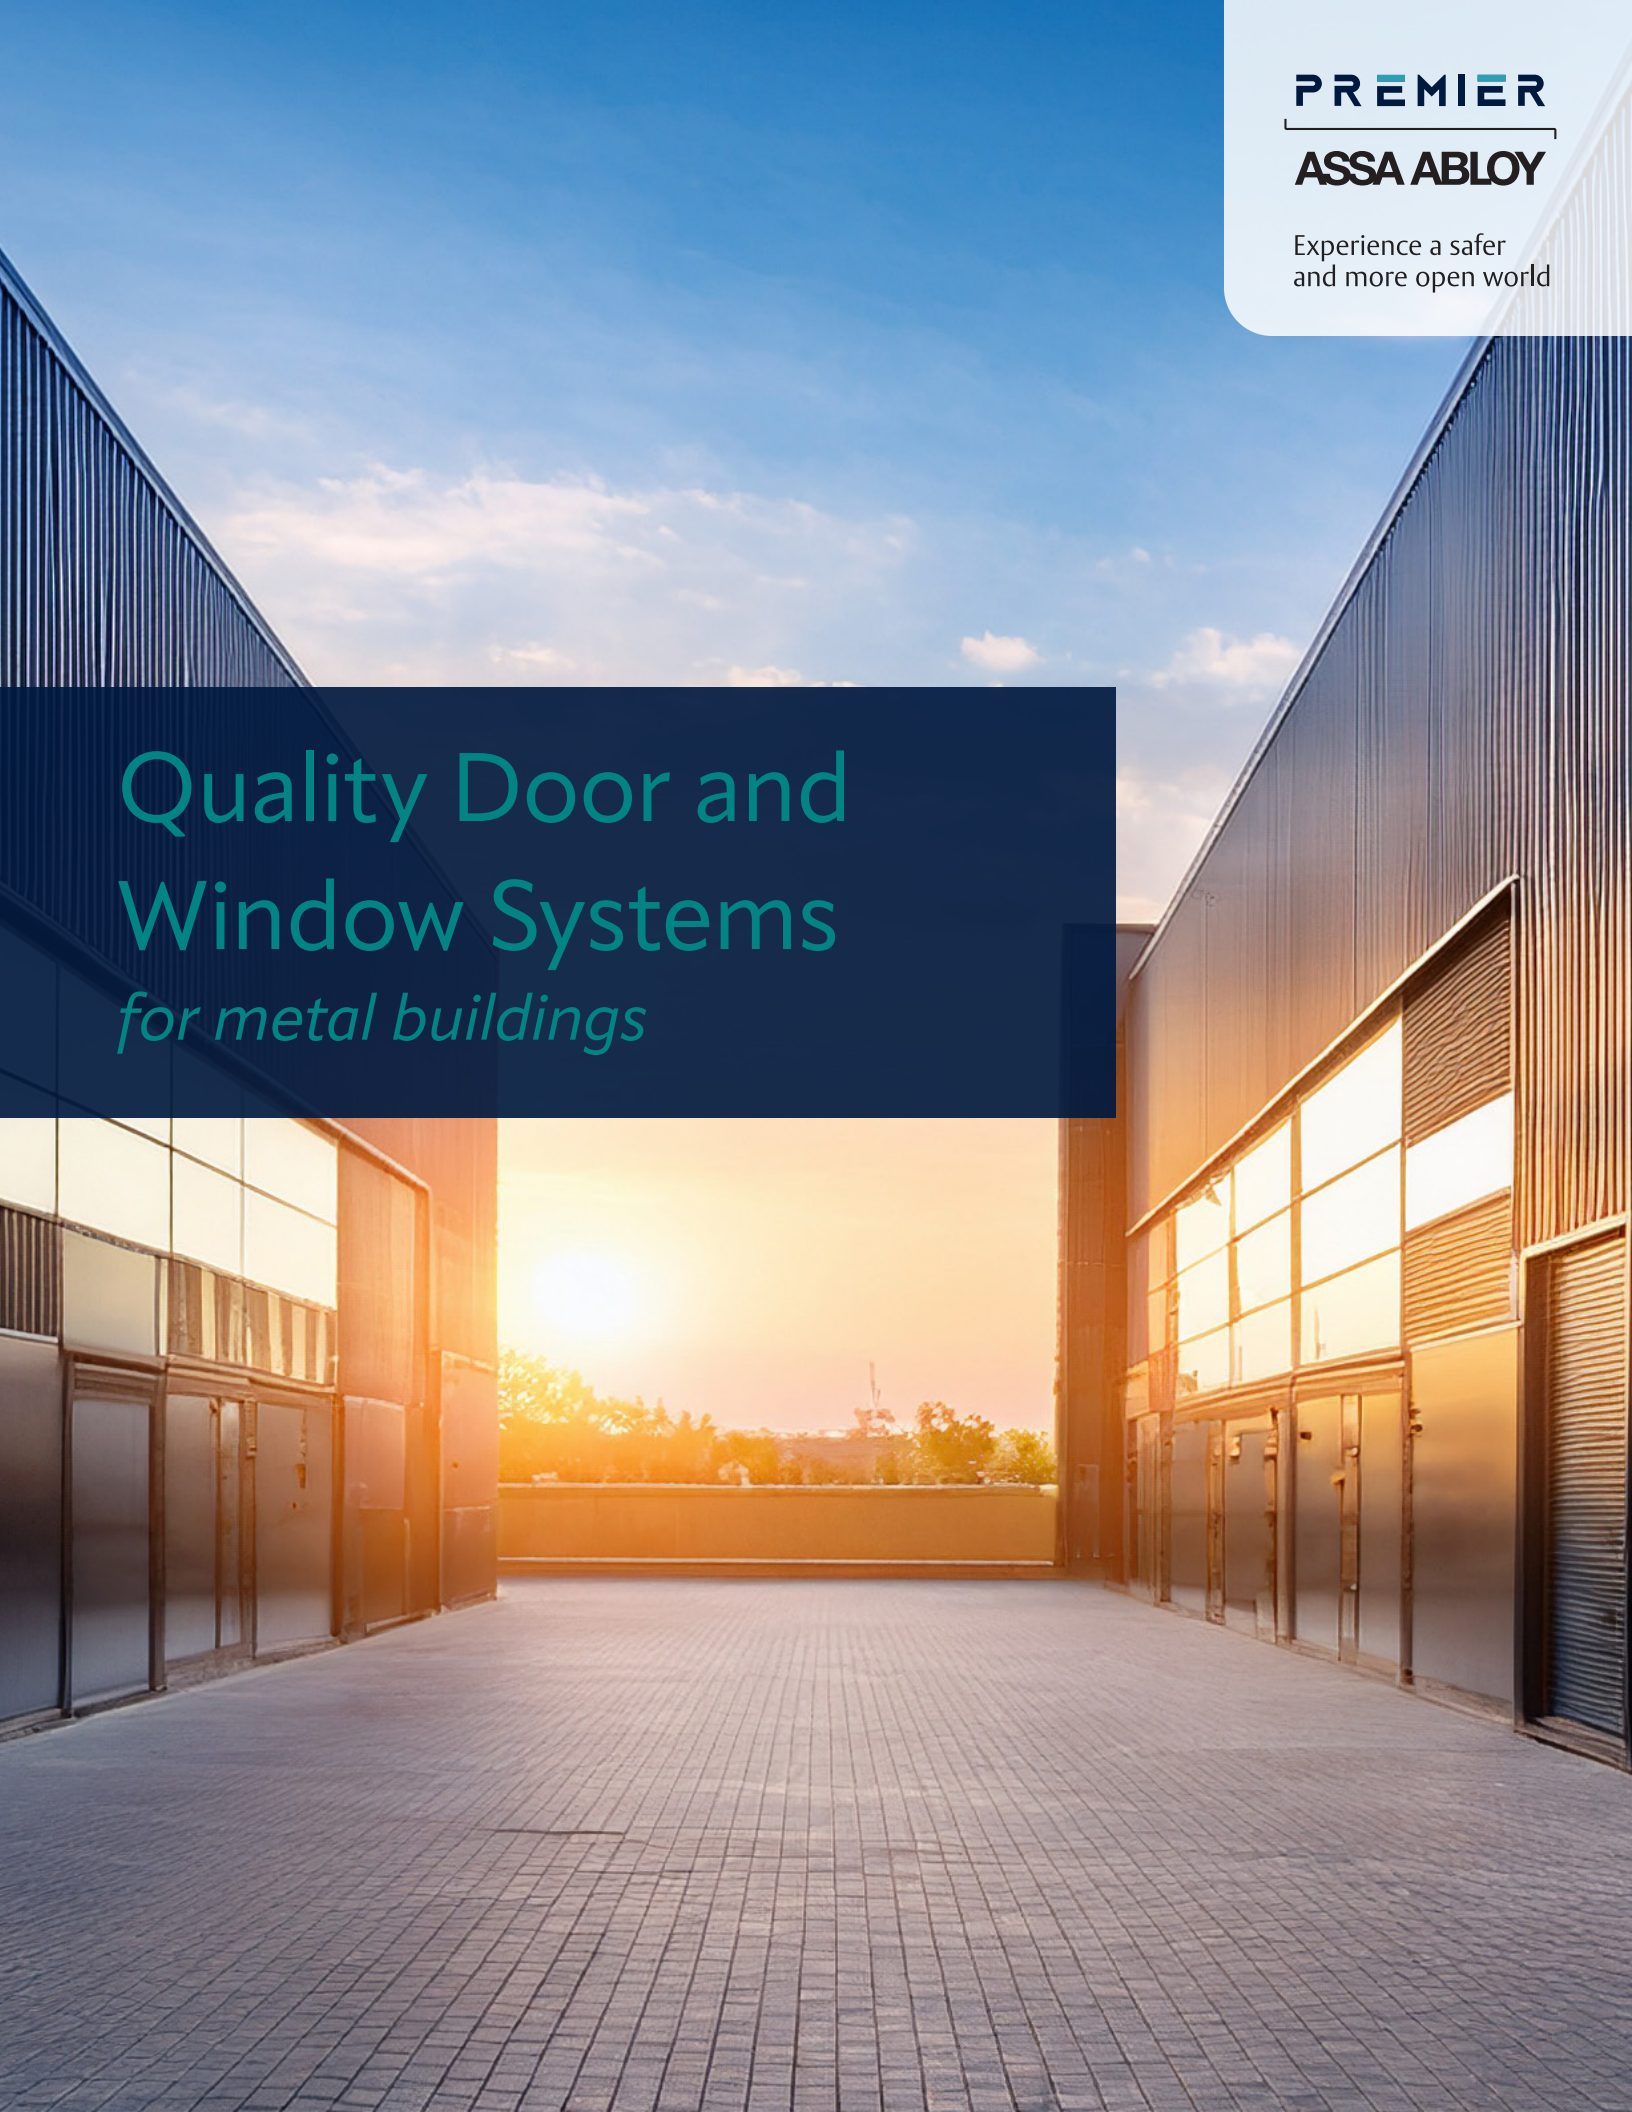
Quality Door and Window Systems

for metal buildings



KNOCK DOWN DOOR SYSTEMS

FEATURES AND BENEFITS:

- Galvanized Doors and Frames
- Insulated Door Cores
- Textured Steel Door Faces
- Completely Reversible (non-handed door systems)
- White and Bronze Colors
- Frame Profiles for Various Girt Sizes
- KERF Frame Profiles
- Clip-on Thresholds
- Full Line of Hardware Items
- Flexible Program Design

Premier Knock-Down Door Systems offer you, the building manufacturer, the greatest degree of design flexibility. These reversible (non-handed) units install quickly and eliminate costly handing errors. Knock-Down door units are typically provided with 20 gauge textured steel door skins in both white and bronze paint finishes. Door units are individually polybagged and cartoned. The Knock-Down frame systems utilize a prepack concept where all required hardware items, hinges, locksets, thresholds, etc., are packaged with the frame. Everything you need for a proper installation is right in the carton. Our clip on threshold and kerf weatherstrip frame profiles are available for almost any girt size.

In addition, Premier can customize a Knock-Down door system to fit your exact specifications or requirements.

Our custom designed programs offer you options for door cores, door sizes, frame profiles and depths, as well as numerous hardware options.

We don't stop there either. We realize that specialty doors, frames, or hardware may be required for a particular project. Premier is a full line manufacturer capable of meeting almost any door and hardware specification. We are a member of the Door and Hardware Institute, NAAMM (HMMA), and the Construction Specifications Institute. Premier's doors and frames are also listed and have been tested with both Underwriters Laboratories and Warnock Hersey. Regional distribution centers are strategically located to help ensure prompt delivery and service. From hurricane tested to fire rated to ADA accessible openings, Premier is capable of handling all of your door, frame, and hardware needs.

ALUMINUM WINDOWS *by* WINTECH

FEATURES AND BENEFITS:

- No Sub Frame Required
- Mill & Bronze Paint Finishes
- Optional Snap-On Jamb Trim
- Numerous Glazing Options
- Side by Side Installations
- Jamb Fins for Multiple Panel Configurations
- Optional Insulation Retainer Packages

Premier Self-Flashing Aluminum Windows are constructed from commercial quality 6063-T5 temper extruded aluminum. Your window choices include horizontal slide, vertical slide, or ixed accent. All window units are self-framing and self-flashing and are available with either double strength (DSB) or hermetically sealed 7/16" insulated glass. Unique jamb fins are provided for architectural panel, 1 -1/4" panel, 3/4" panel, or straight panel applications. Optional flush snap-on jamb trim can also be provided to give the window a true finished look. Window units can even be mulled together for a side by side installation.

Operable windows are furnished with insect screens and modern sash locks at the meeting stiles for security. Horizontal slider roller systems consists of an injection molded nylon housing with brass tire on a stainless steel axle.

Horizontal and single hung windows are additionally provided with medium density polypropylene pile weatherstrip with mylar fin. All window units are individually cartined.

Along with our standard sizes and designs, Premier can also provide custom windows. Numerous glazing options, including tinting and tempered glass, are available. We can even tailor a window program to meet your specific needs. So whatever size, style, or glazing option you may require, Premier can satisfy all your window requirements.

FEATURES AND BENEFITS:

- Complete Line of Builders Hardware
- ADA Compliant Products
- Unique Clip-On Threshold
- Kerf Weatherstrip
- Multiple Keying Options
- Large Stock Inventory

" No matter where I am, Premier is always there to answer my questions. I consider them a valuable part of my team."

Ruffin Building Systems

" Premier adds exceptional value and quality to our product line and helps keep our pricing competitive. Premier is appealing to both customers and architects who like the fact that their doors are galvannealed and insulated at no additional charge."

RG & Associates

" Premier takes care of its customers. They are known for high quality products and exceptional customer service. The level of service they provide is unsurpassed in the industry. Central States Mfg. is proud to carry the Premier product line."

Central States Manufacturing, Inc.

HARDWARE

Premier offers a full line of related builders hardware items including ADA compliant products. Premier carefully selects its hardware from manufacturers that have a proven track record for performance and quality.
Premier features its own unique Clip-on Threshold specifically designed for exterior metal building applications. This threshold clips on to the frame jambs and dramatically improves overall installation time.

Premier maintains a large inventory of hinges, lever locksets, panic devices, door closers, and numerous other items as well. Specialty items are also available upon request.

Premier can take care of your builders hardware requirements!

Clip-on Threshold

QUALITY

At Premier, quality counts, and it shows. Premier utilizes hot dipped galvanized steel in its fabrication process. Hot dipped galvanized steel is far superior at resisting external elements than traditional cold rolled materials. Our Frames are brake formed to assure true, sharp radii and to minimize camber. All frames receive a modified alkyd primer utilizing a dip process to ensure complete coverage. We do this because the dip process significantly helps prevent rusting from the inside out –where it typically starts. Pre-finished metal building frames receive an additional top-coat, providing you with a double thickness of protection.

Door skins are roll formed and utilize a mechanical interlocking edge seam. Doors are galvanized and treated with a factory applied wash primer and sealer prior to being painted. This process helps ensure proper paint adhesion.

We are a proud member of NAAMM (HMMA), the Door and Hardware Institute, and the Construction Specifications Institute. Our fire doors and frames have also been successfully tested with both U.L. and Warnock Hersey for some of the industry's best fire and hurricane ratings. Premier windows are self-flashing and designed specifically for metal building applications.

When you buy Premier, you buy quality!

- Member: Door and Hardware Institute
- Member: The Construction Specifications Institute
- Member NAAMM (HMMA)
- U.L. and W.H.I. Fire and Windstorm Rated Doors
- Galvanized Steel – Standard
- Frames Prime Painted by Dip Process

SERVICE

Service can often make or break a company. It certainly can separate one competitor from another. At Premier, we consider service to be our greatest attribute. We have a knowledgeable and friendly staff trained to help you solve even the most difficult project requirements. If you're not sure what you need, our dedicated and experienced staff can help you figure it out. You're not "just a number" to us. You are the lifeline of our company. We strive every minute of every day to make sure your needs are met. From three different locations, we are there when you need us. Please give us a call. You'll have a great feeling doing business with Premier
